

Five local bowling centers have installed state of the art air filtration systems.

GPS Needlepoint Bipolar Ionization Air Filters Installed

BIG 815 Bowling NEWS!!!!

CLEANER AIR

safer air

TARGETS PARTICLES

When these ions disperse throughout a space, such as an office or a schoolroom, they combine with particles suspended in the air. This creates a snowball effect in which particles of opposite polarities begin to cluster together, which makes them easier to capture in filtration systems.

TACKLES ODORS

GPS' NPBI technology breaks down chemical, pet, cooking and other odors into basic harmless compounds, leaving indoor air smelling fresh and substantially reducing odor-causing VOCs.

REDUCES PATHOGENS

During the NPBI process, contact with ions disrupts pathogens' surface proteins, rendering them inactive and unable to replicate.

(Covid-19)**

WHAT IS OZONE?

Ozone, or O₃, in the upper atmosphere is formed naturally and protects Earth from harmful UV radiation. Ground-level ozone is primarily man-made and is harmful to breathe. Certain types of ionization products produce ozone, but GPS' NPBI technology does not.
